To play the game, gamblers select one treasure chest from a big pile. Clicking a treasure chest reveals a bonus prize – the amount of treasure in the chest the player picks is their bonus amount. Since the amount won in the chest is then multiplied by the player's chosen number of coins wagered per line and the number of enabled pay lines, bonuses are larger depending on how many credits are being wagered per spin. Gamblers wagering the maximum number of credits to chase the title's progressive prize also get a nice multiplier on any prizes won in the bonus game – the maximum five coins on all nine pay lines increases the bonus amount found in the treasure chest by a factor of forty-five. radio competitions melbourne
