The objectives of this Triple Sevens Blackjack game is just like any other game where the online player is required to play a hand which is more than the dealer hands but not exceeding the number 21. The hand which has the 3 sevens of the same suit obviously equaling 21 wins the progressive jackpot. The math is pretty simple: there are three symbols on each reel, and five reels to deal with, making the total number of combinations possible three to the fifth power (3^5), or 243. On a few games, like Leagues of Fortune, you'll see four symbols displayed

on each row; that greatly increases the number of possible paylines, making these games 1024 Ways machines. One game we know of – Dolphin Coast – is actually a 3125 Ways pokie, since there are five symbols displayed on each reel. slot machine strategy to win
